REPORT

This report presents an analysis of inflation trends across different regions over the years, highlighting key economic impacts.

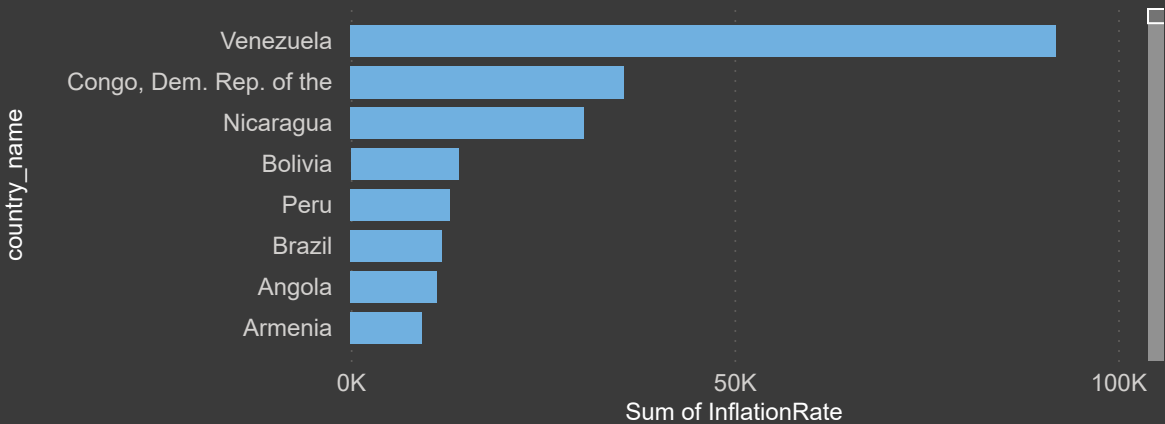

Report

- 1. **Global Trends:** Inflation rates vary across regions, with developing economies showing higher volatility compared to developed nations.
- 2. **Inflation Categories:** Countries with inflation rates below 2% are categorized as **Low**, 2-5% as **Moderate**, and above 5% as **High**.
- 3. **Yearly Changes:** Inflation has shown an increasing trend in the last decade, with significant spikes during economic crises.
- 4. **Country-Specific Insights:** Certain countries have consistently high inflation due to unstable economies, while others maintain low inflation through strong monetary policies.
- 5. **Impact on Economy:** High inflation correlates with a decline in purchasing power and rising costs of living, affecting GDP growth.
